

Plankton Energy | Greenfield Community Solar

Basic Information	Goal Offering: \$634,325.00
	Maximum Offering: \$792,575.00 - Debt Note - 8.5% Annual Interest Rate - 12 Months Tenor - \$10 minimum investment with \$1 increments
Description	We're bringing clean energy to more people with this 295 kW community solar project in Greenfield, MA.
	Built with domestic content and backed by the Massachusetts SMART program, it opens the door for households who can't install rooftop solar to still benefit from it.
	At Plankton, we're not just developing solar ,we're reshaping how communities access it. This project reflects our commitment to high-quality, community-first energy solutions that deliver both environmental and financial returns.
	Images shown reflect prior work by Plankton Energy and are representative of our capabilities, but may not depict this specific project.
Team	At Plankton, we help clients unlock financial and environmental value through tailored commercial solar solutions. Every property and ownership structure is different, so we craft portfolio-wide strategies that maximize both savings and sustainability.
	Since our founding in 2018, our team of experts in development, engineering, construction, and finance, has developed over a gigawatt of clean energy projects and deployed solar across 85 commercial properties.
Impact	The system is expected to generate 372,000 kWh of electricity annually, avoiding 264 metric tons of CO ₂ emissions every year, the equivalent of taking 653,000 miles of gas-powered driving off the road.

**Use of
Proceeds**

Funds will be used to construct the system

**Financial
Information**

12-month, interest-only loan with an 8.5% annual fixed interest rate. Investors receive quarterly interest payments on January 1, April 1, July 1, and October 1.

At maturity, a final lump-sum payment includes all remaining interest and full principal repayment.

The loan is secured by a lien on project assets and may be prepaid without penalty.
